

The Helios medium pressure axial fans are ideally suited for diverse fields of application in professional ventilation technology, like e.g. in ventilation systems for car parks, shopping malls and public buildings as well as smoke and heat exhaust fans and smoke protection pressure systems.

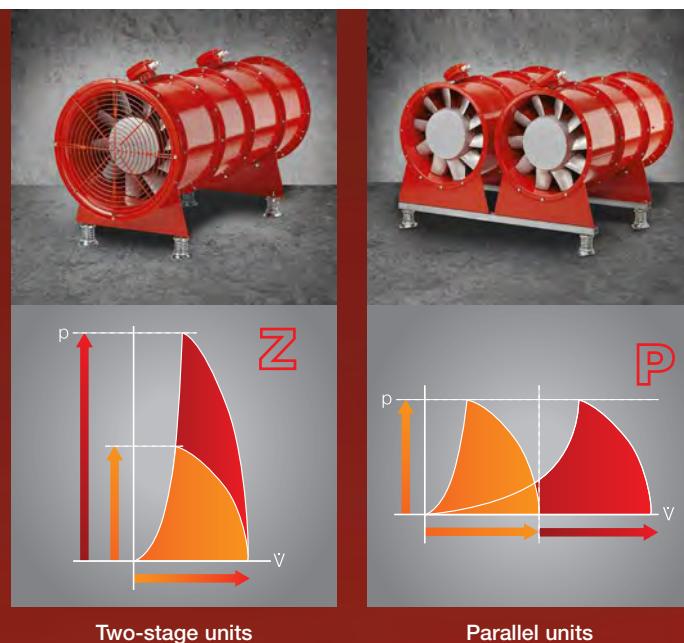

As two-stage, in-line Z- or parallel P-units they are ideal for use in car parks. Universal installation possibilities (horizontal and vertical positioning) provide for flexible use. As smoke and heat exhaust fan, the series B AMD is used within the fire zone, outside the fire zone (with heat and sound insulation L90), as well as outside the building.

The main advantages of medium pressure axial fans AMD and AMD B are:

- Aerodynamically profiled blades from high-strength aluminum alloy.
- Casing from sheet steel with surface protection.
- Guide vane from steel.
- Delivery ready for connection.
- Universal installation possibilities

For the fulfilment of versatile TGA-requirements with regard to pressure rise, flow rate, space requirements, the arrangement of two identical fans in a row (Z) or side by side (P) is ideal.

*Details see page 6 on.*

**Medium pressure axial fans.  
Maximum performance for  
diverse applications.**

**With flow rates up to 113 000 m<sup>3</sup>/h and very high pressure figures till 1 400 Pa the medium pressure axial fan series correspond ideally to the varied standards of the professional TGA ventilation technology.**

The AMD and B AMD types combine highest performance with efficient energy consumption. The factory adjustable, profiled blades made of aluminum cast alloy ensure precise adjustment to the respective operating point. An adjustment of the motor power to the respective project standards is easily possible with the help of the performance-related characteristic curve portrayal.

HELIOS medium pressure axial fans are available for ventilation at normal air flow temperatures from -20 °C to + 40 °C (AMD) or in the temperature classes F300 and F400 (B AMD) for use as mechanical smoke extraction systems (MRA). There are over 300 types in 12 sizes (sizes 315-1120) available.

### ■ Application

- Versatile application in the TGA-ventilation technology, e.g. for car park ventilation, in smoke pressure systems, etc.
- For preventive fire protection to secure smoke and heat extraction.
- For applications with air flow temperatures of 300 °C for 120 minutes and 400 °C for 120 minutes (F300 and F400).
- Suitable for continuous operation for temperature from -30 °C to +40 °C.

### ■ Casing

- Cylindrical duct with welded motor supporting plate and guide vane made of sheet steel. With flanges on both ends (except AVD DK) steel to DIN 24155 PT3. For direct in-line installation in ducting.
- Surface protection by powder coating RAL 7015 (grey).

### ■ Impeller

- Hub and blades from corrosion-resistant aluminum alloy.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Pitch angle of the blades adjustable and factory set according to the ordered, optimal operating point.

### ■ Motor

- Series AMD:  
Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD:  
Direct driven by IEC-three phase a.c. motor (Smoke Extraction Motors F300 or F400). Protection to IP 55. Insulation class H. External cable with sheathing. Depending on the installation situation, relubrication intervals or bearing replacements must be observed (see installation and operating instructions).

### ■ Speed control

Stepless (0-100 %) by use of frequency inverters (pole-switching models excluded). The planned use of a frequency inverter without sine filter must be stated when ordering. This causes a change of the fan execution and if necessary additional costs. If used as smoke and heat exhaust fan these switching devices on the on-site control are to be bridged.

### ■ Motor protrusion

With some types, the motor casing projects beyond. Protrusion dimension B mm is to be

observed according to the type table.

### ■ Motor protection

- Series AMD:  
All types (pole-switching models excluded) are available with PTC-resistors, which are connected to the terminal box located on the outside of the casing (special execution). With that an effective motor protection by means of full motor protection unit (MSA, Ref. no. 1289, accessories) or frequency inverter (accessories) is possible. Models without PTC-resistors are to be protected by means of motor protection switch on site.

### ■ Series B AMD:

The B AMD types are to be protected by means of motor protection switch on site. In case of smoke extraction this must be bridged.

### ■ Electrical connection

- Series AMD:  
Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD:  
Standard terminal box (protection to IP 55) from aluminium diecasting, mounted on the outside of the casing.
- Terminal box is mounted with an permanently attached cable with fire-resistant protective sheathing.

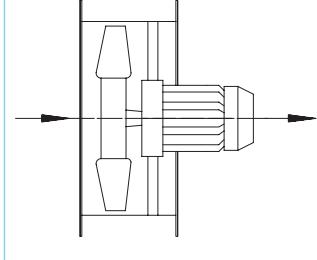

### ■ Air flow temperatures

- Series AMD:  
Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD:  
Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

### ■ Air flow direction

- The fans come in air flow direction B = pushing air over the motor (Fig. 1).

**Fig. 1**

### ■ Sound levels

- On the product pages above the performance curves are the spectrum figures and total sound

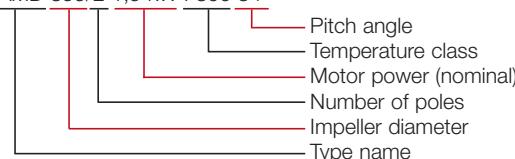

power levels for different pitch angles indicated.

### ■ Order data

The desired pitch angle of the blades is mandatory when ordering.

Example:

B AMD 355/2 1,5 kW F300 34°

### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied.

Approved by the CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

### ■ Selection of anti vibration mounts

In order to reduce the vibrations caused by rotating components in the fan optimally the right selection of the anti vibration mounts is essential. The layout is based on the calculated weight of fan including accessories, which is to be damped. For this purpose, the individual weights of the components must be added.

### ■ Example 1:

#### B AMD 710/4 7,5 kW F300 with extension duct

1. Determining the weight to be damped  

|                    |                 |
|--------------------|-----------------|
| Weight B AMD 710/4 | 152 kg          |
| Weight VR 710      | 21,5 kg         |
| Total weight:      | <u>173,5 kg</u> |
2. Selection of anti vibration mounts (see page 150)  
 » up to 210 kg = **SDD 5**

### ■ Example 2:

#### B AMD 710/4 7,5 kW F300 as P-unit

1. Determining the weight to be damped  

|                    |               |
|--------------------|---------------|
| Weight B AMD 710/4 | 152 kg        |
| Weight B AMD 710/4 | 152 kg        |
| Weight MP-P 710    | 145 kg        |
| Total weight:      | <u>449 kg</u> |
2. Selection of anti vibration mounts (see page 150)  
 » up to 580 kg = **SDD 7**

### ■ Example 3:

#### B AMD 710/4 7,5 kW F300 as Z-unit

1. Determining the weight to be damped  

|                    |                 |
|--------------------|-----------------|
| Weight B AMD 710/4 | 152 kg          |
| Weight B AMD 710/4 | 152 kg          |
| Weight MK 710      | 10,5 kg         |
| Weight MP-Z 710    | 43 kg           |
| Total weight:      | <u>357,5 kg</u> |
2. Selection of anti vibration mounts (see page 150)  
 » up to 400 kg = **SDD 6**

## ■ Installation

- Horizontal and vertical installation depending on the place of installation:
  - Within the fire zone, without heat and sound insulation.
  - Outside of the fire zone, within the building with heat and sound insulation L 90.
  - Outside of the building without heat and sound insulation.

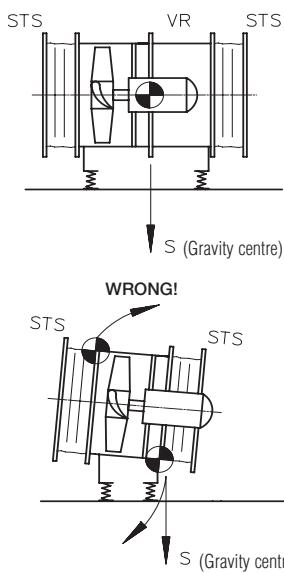

To avoid vibration transmission to building and ducting the use of anti vibration mounts (accessories SDD, SDZ) is highly recommended.

**Compliance with the Federal, as well as the regional fire protection regulations.**

### Duct installation (tilting)

To prevent a tilt-affinity during installation of medium pressure axial fans with flanged flexible connectors on each side (STS, accessories), an extension duct (type VR, accessories) is to be provided (Fig. 2).

**Fig. 2 CORRECT!**

### Duct installation (horizontal)

Arrangement of the mounting feet MK (accessories) and anti vibration mounts on both flange sides of the unit. Use of anti vibration mounts for compression (SDD, accessories) or for suspension (SDZ, accessories, for ceiling suspension). To prevent sound and vibration transmissions flanged flexible connectors STS (accessories) are to be provided on each side (Fig. 3).

### Two-stage and parallel units

The versatile requirements with regard to pressure rise, flow rate and space requirements are fulfilled in the area of technical building equipment (TGA) often by two-stage Z- or parallel P-units. The Helios program offers suitable mounting packages for the respective units:

### Two-stage unit / Mounting package MP-Z (Fig. 6)

Two fans connected in series ensure unrivalled power density and favourable installation with minimum space requirements. The two fans are arranged in a row and connected by means of extension ducts.

#### Mounting package MP-Z (Scope of delivery):

Extension ducts (2 pcs) incl. assembly kit (Hexagon head screws,-nuts, spring washers).

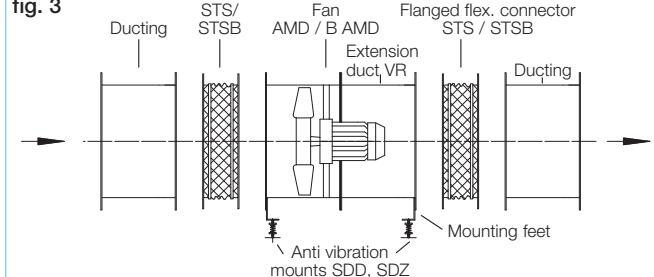

### Parallel unit / Mounting package MP-P

Two parallel connected fans bring high flow rates at suitable pressure rate and fulfill especially the requirements for car park ventilation and smoke extraction. Two identical fans which are arranged side by side operate in a joint duct system.

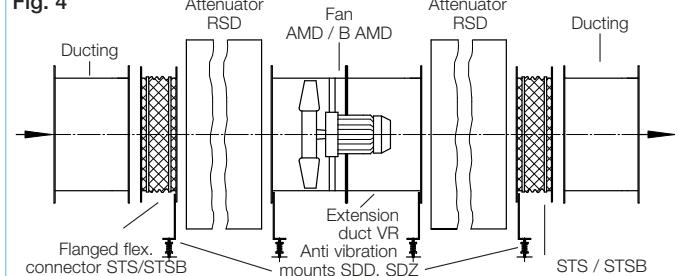

#### Mounting package MP-P (Scope of delivery):

Extension ducts (2 pcs), back draught shutters (2 pcs), mounting feet (4 pcs), mounting bars (2 pcs), assembly kit (Hexagon head screws,-nuts, spring washers, washers and threaded plate).

All dimensions in mm

#### ■ Application, casing, air flow direction, etc.

see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD: Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD: Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD: Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD: Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

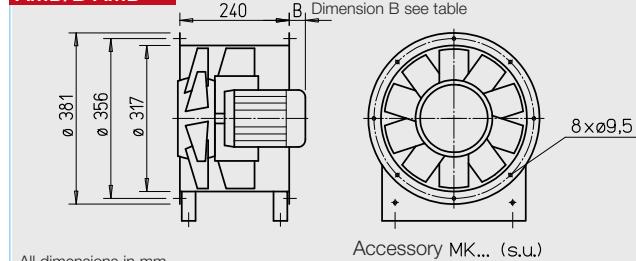

#### ■ Air flow temperatures

- Series AMD: Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD: Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

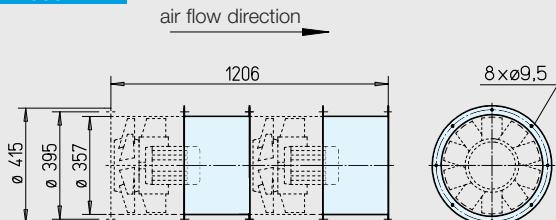

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150.

<sup>5)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

(Fig. incl. mounting feet (MK), accessories)

#### MP-Z 355

All dimensions in mm

#### ■ Application, casing, air flow direction, etc. see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD:  
Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD:  
Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD:  
Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD:  
Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

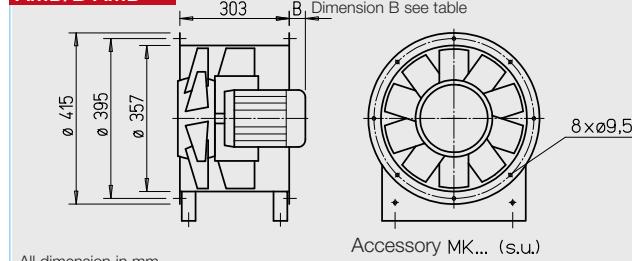

#### ■ Air flow temperatures

- Series AMD:  
Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD:  
Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

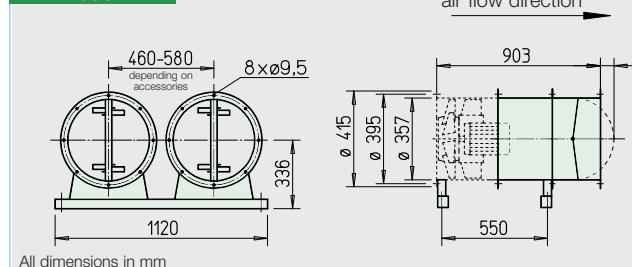

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

#### AMD/B AMD

Accessory MK... (s.u.)

#### MP-P 355

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 8 kg

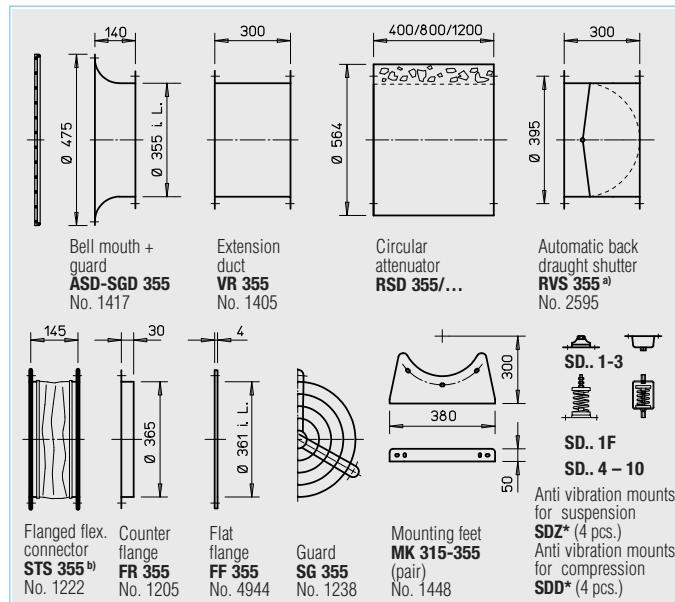

**MP-Z 355** Ref. No. 4904

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 27 kg

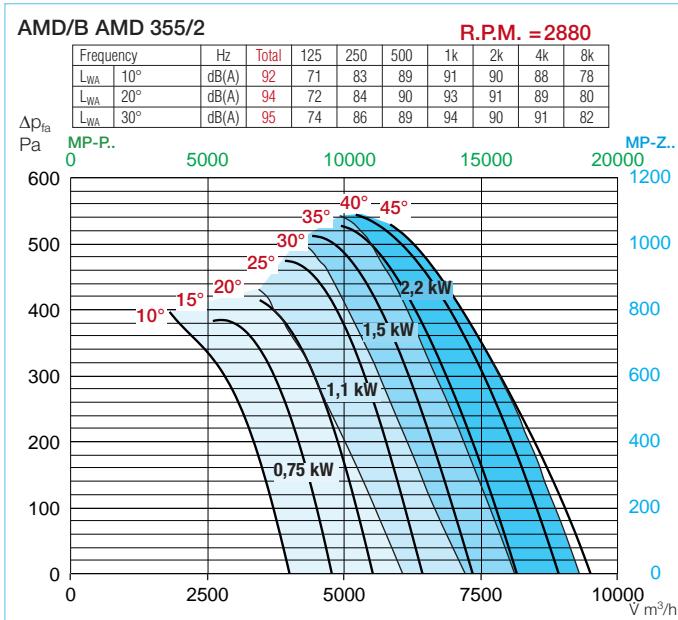

**MP-P 355** Ref. No. 4888

a) For motorised shutters, for ventilation operation, see accessory pages

b) Type for B AMD: STSB 355 F400, No. 14744

\* Type assignment see table, last column

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

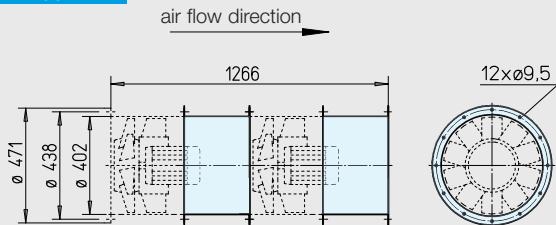

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150.

<sup>5)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

(Fig. incl. mounting feet (MK), accessories)

#### MP-Z 400

All dimensions in mm

#### ■ Application, casing, air flow direction, etc. see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD:  
Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD:  
Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD:  
Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD:  
Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

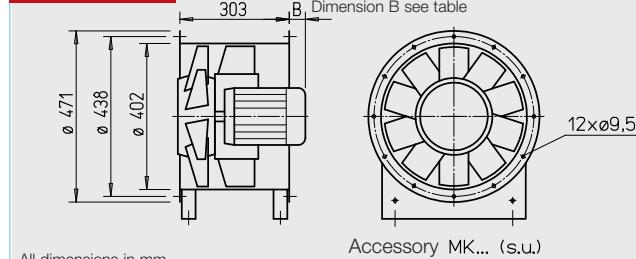

#### ■ Air flow temperatures

- Series AMD:  
Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD:  
Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

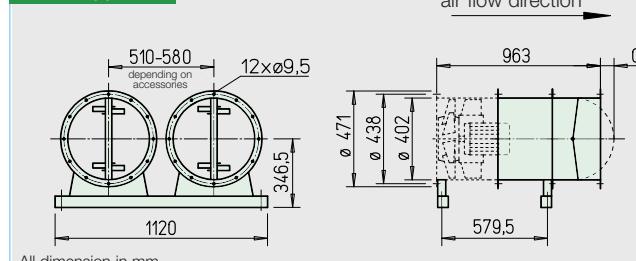

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

#### AMD/B AMD

#### MP-P 400

All dimensions in mm

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 12 kg

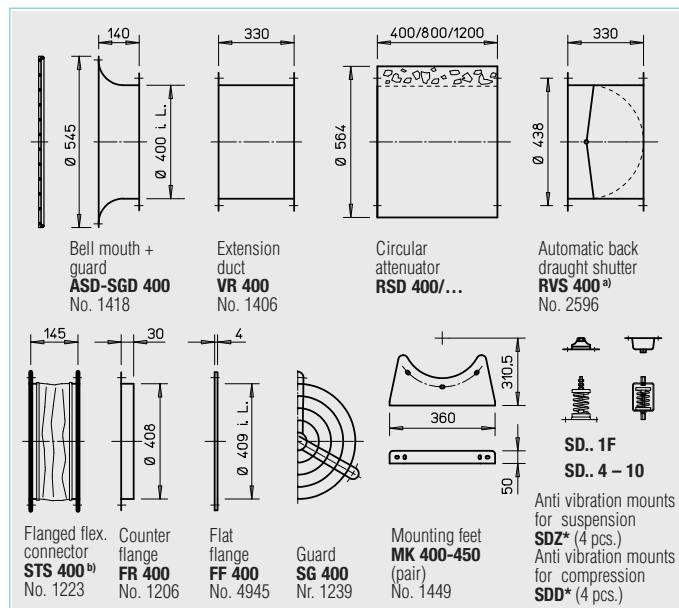

**MP-Z 400** Ref. No. 4905

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 35 kg

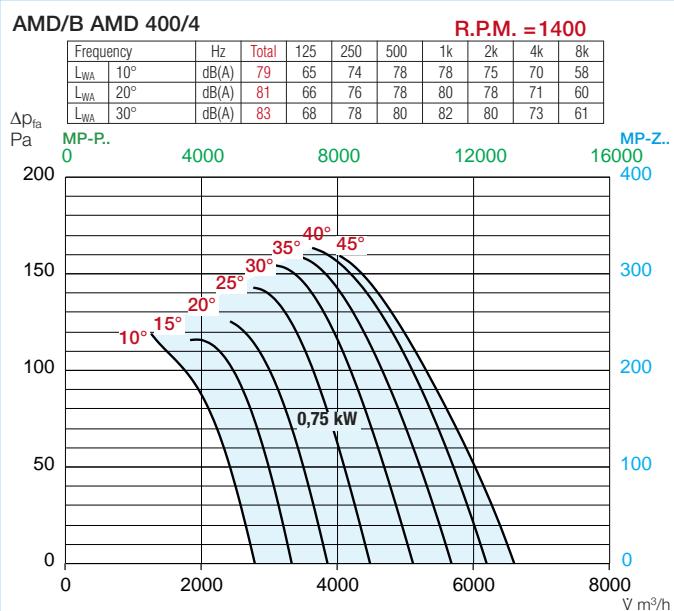

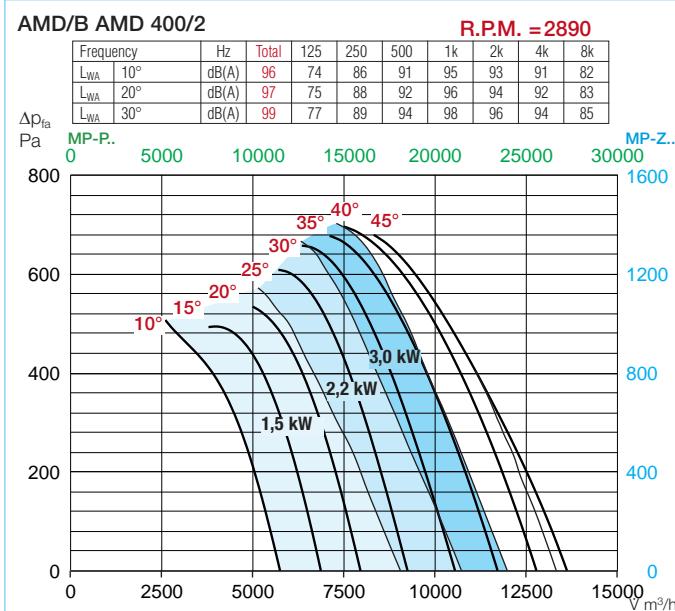

**MP-P 400** Ref. No. 4889

<sup>a)</sup> For motorised shutters, for ventilation operation, see accessory pages

<sup>b)</sup> Type for B AMD: STSB 400 F400, No. 14743

\* Type assignment see table, last column

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150.

<sup>5)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

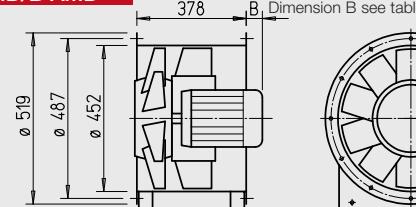

((Fig. incl. mounting feet (MK), accessories)

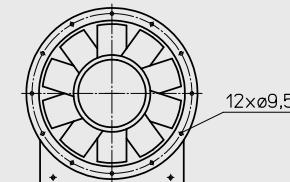

### Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

### AMD/B AMD

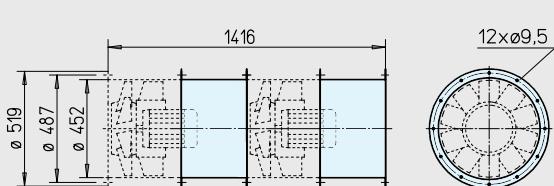

All dimensions in mm

Accessory MK... (s.u.)

### MP-Z 450

air flow direction

All dimensions in mm

### Application, casing, air flow direction, etc.

see page 46.

### Impeller

Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.

Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.

The pitch angle of the blades is adjustable at standstill and factory set.

### Motor

Series AMD:

Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.

Series B AMD:

Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

### Motor protrusion

With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

### Motor protection

Types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

### Electrical connection

Series AMD:

Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.

Series B AMD:

Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

### Air flow temperatures

Series AMD:

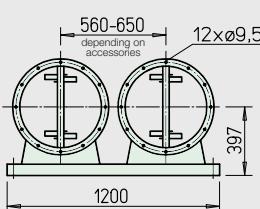

Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.

Series B AMD:

Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

### MP-P 450

air flow direction

All dimensions in mm

### Mounting package MP-Z for two-stage Z-unit

### Mounting package MP-P for parallel P-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 14 kg

### MP-Z 450

Ref. No. 4906

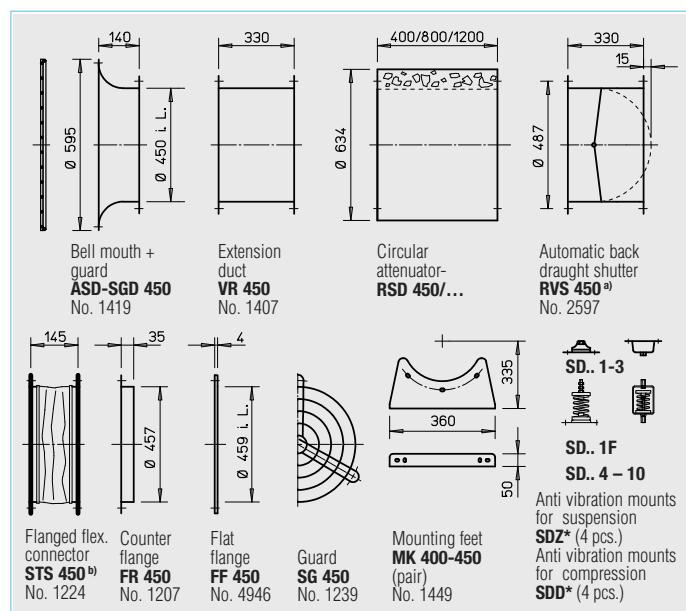

### Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 43 kg

### MP-P 450

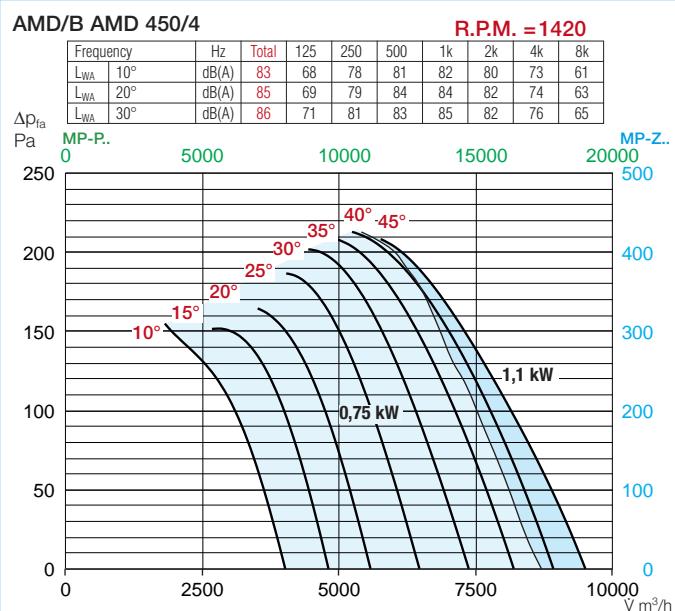

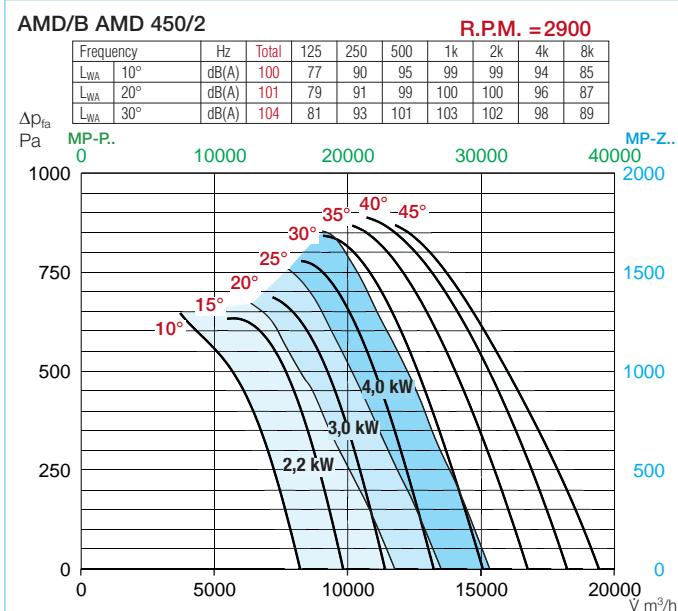

Ref. No. 4890

a) For motorised shutters, for ventilation operation, see accessory pages

b) Type for B AMD: STSB 450 F400, No. 14742

\* Type assignment see table, last column

Pole switch surface mounted

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

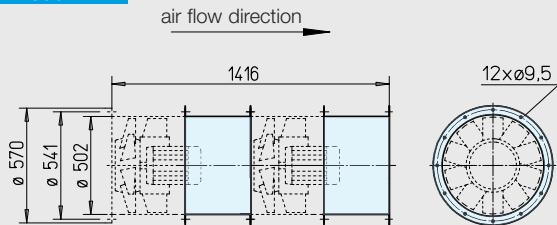

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150. <sup>5)</sup> Y/Δ starting.

<sup>6)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

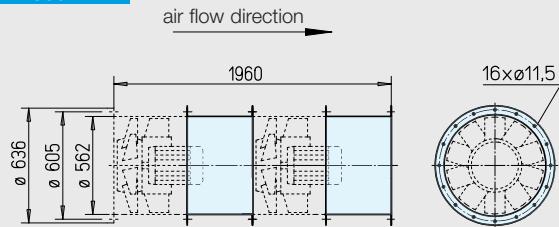

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150. <sup>5)</sup> Y/Δ starting.

<sup>6)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

((Fig. incl. mounting feet (MK), accessories)

#### MP-Z 560

All dimensions in mm

#### ■ Application, casing, air flow direction, etc.

see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD: Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD: Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD: Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD: Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

#### ■ Air flow temperatures

- Series AMD: Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD: Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3, the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

Accessory MK... (s.u.)

#### MP-P 560

All dimensions in mm

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 32 kg

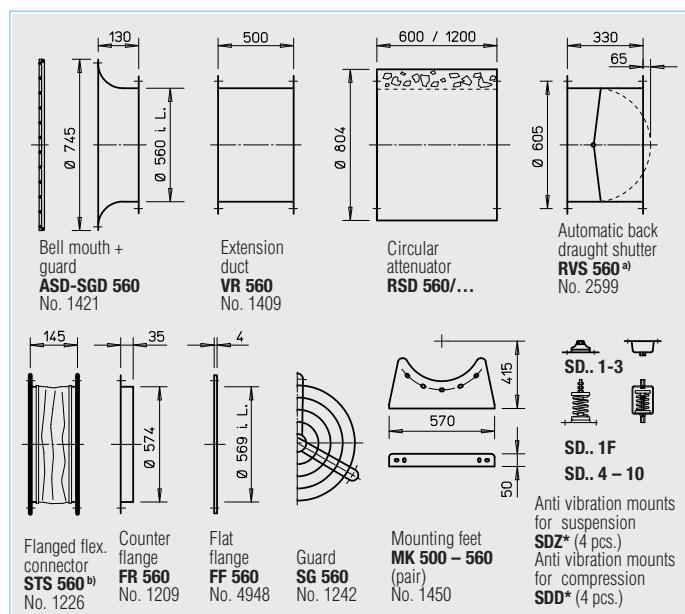

**MP-Z 560** Ref. No. 4908

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 82 kg

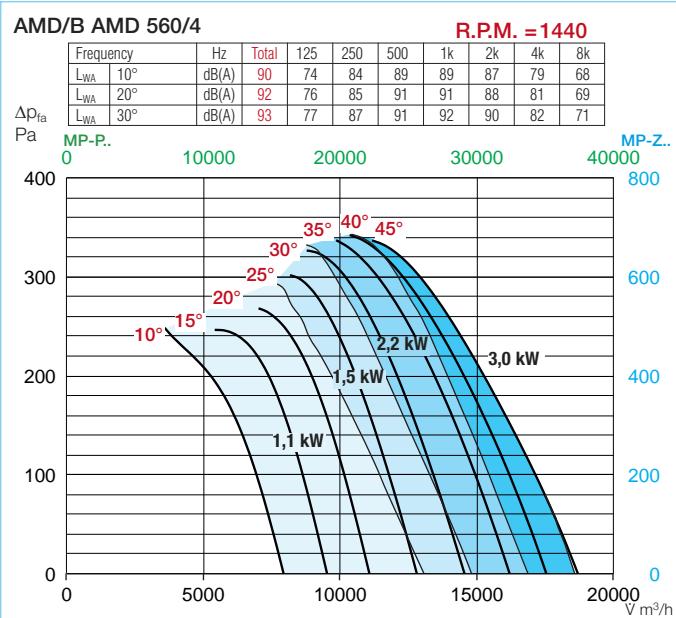

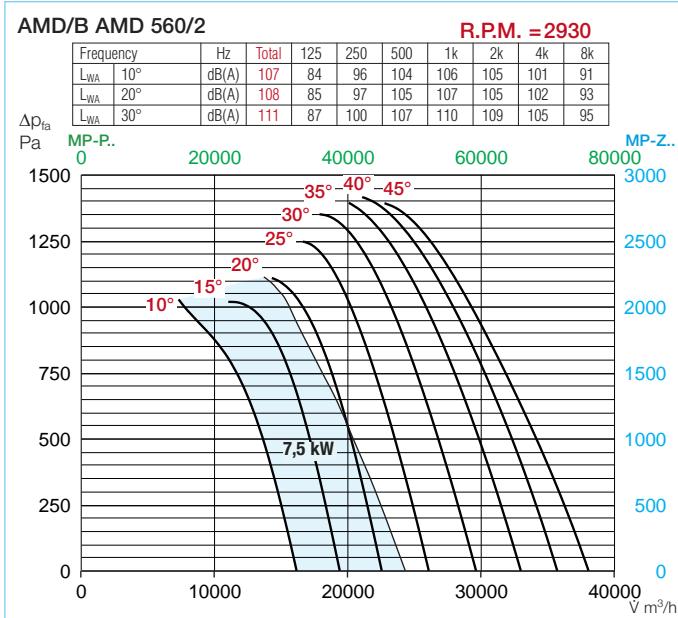

**MP-P 560** Ref. No. 4892

a) For motorised shutters, for ventilation operation, see accessory pages

b) Type for B AMD: STSB 560 F400, No. 1916

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

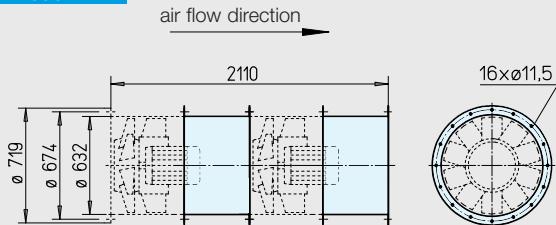

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150. <sup>5)</sup> Y/Δ starting.

<sup>6)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

(Fig. incl. mounting feet (MK, accessories))

#### MP-Z 630

All dimensions in mm

#### ■ Application, casing, air flow direction, etc.

see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD: Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD: Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD: Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD: Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

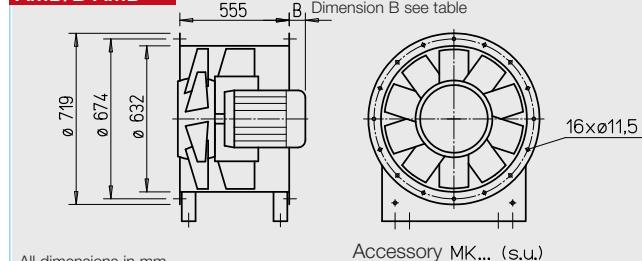

#### ■ Air flow temperatures

- Series AMD: Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD: Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

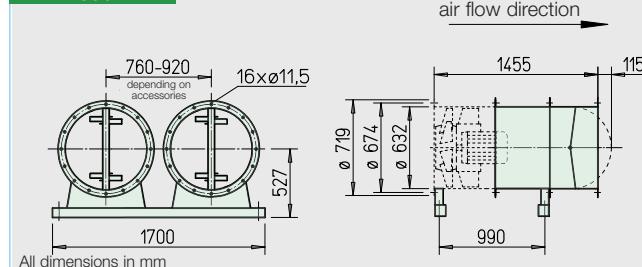

#### AMD/B AMD

All dimensions in mm

Accessory MK... (s.u.)

#### MP-P 630

All dimensions in mm

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 36 kg

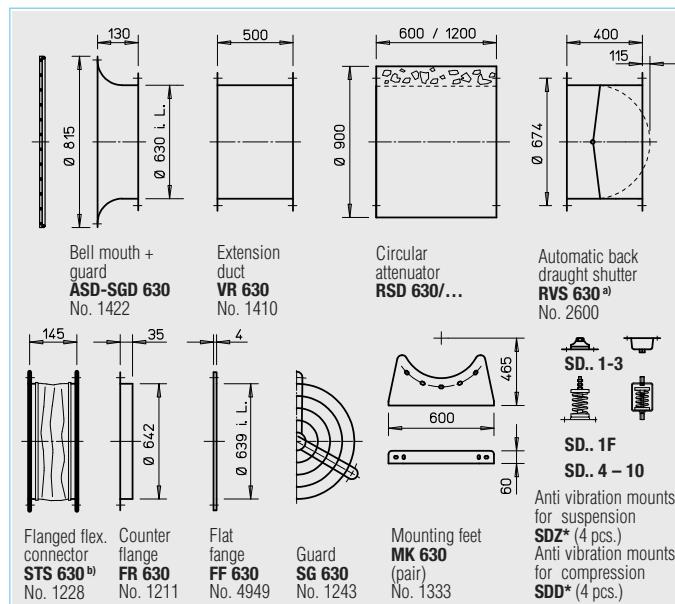

**MP-Z 630** Ref. No. 4909

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 110 kg

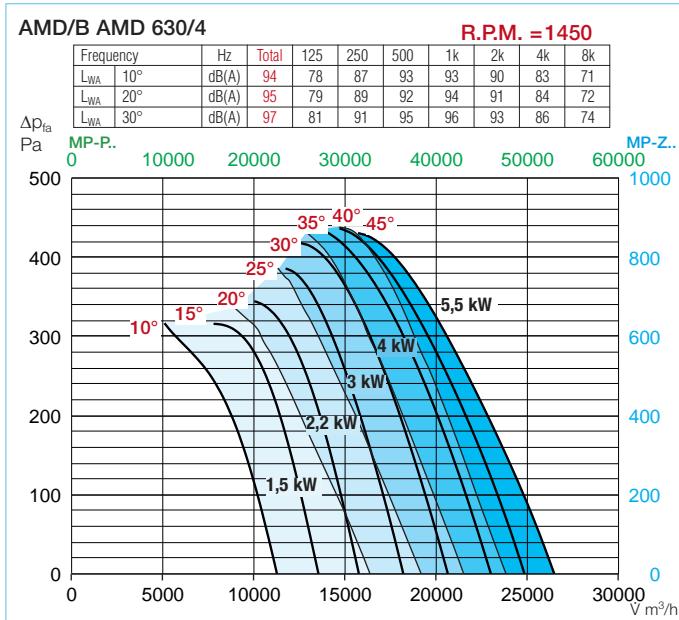

**MP-P 630** Ref.-No. 4893

a) For motorised shutters, for ventilation operation, see accessory pages

b) Type for B AMD: STSB 630 F400, No. 1917

\* Type assignment see table, last column

## ■ Special executions

Special execution with inspection opening (additional price) on request.

Special execution with PTC-resistors, which are connected to the terminal box located on the outside of the casing (additional price), essential for operation in connection with frequency inverter or full motor protection switch MSA, always specify when ordering.

Pitch angle is mandatory when ordering. 1) During ventilation / smoke extraction (nonrecurring 120 minutes). 2) Higher air flow temperatures during continuous operation (ventilation mode) on request.

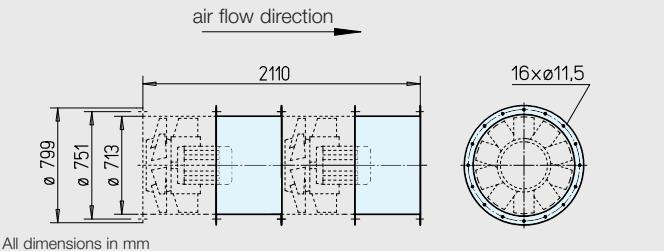

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecycling 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation.

6) Flush mounted version see product page switches. 4) With Z-7/P design due to higher total weight, type assignment according to tables of

(Fig. incl. mounting feet (MK), accessories)

#### MP-Z 710

All dimensions in mm

#### ■ Application, casing, air flow direction, etc.

see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD: Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD: Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing..

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD: Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD: Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

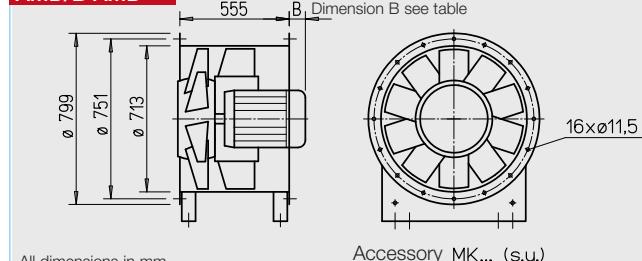

#### ■ Air flow temperatures

- Series AMD: Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD: Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

#### MP-P 710

All dimensions in mm

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 43 kg

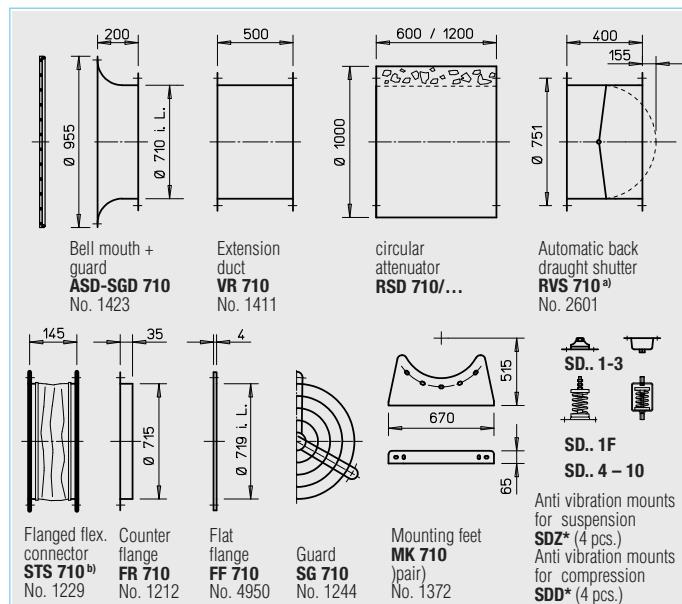

**MP-Z 710** Ref. No. 4910

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 145 kg

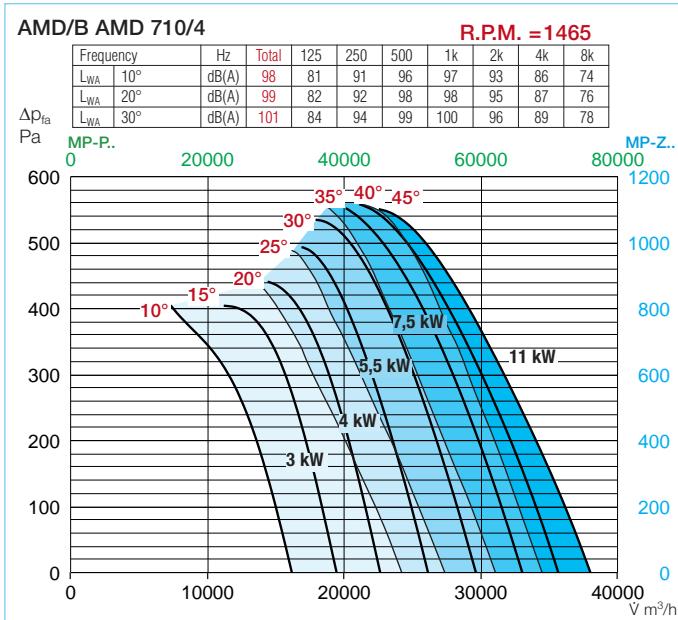

**MP-P 710** Ref. No. 4894

a) For motorised shutters, for ventilation operation, see accessory pages

b) Type for B AMD: STSB 710 F400, No. 1918

\* Type assignment see table, last column

■ Special executions

Special execution with inspection opening (additional price) on request.

Special execution with PTC-resistors, which are connected to the terminal box located on the outside of the casing (additional price), essential for operation in connection with frequency inverter or full motor protection switch MSA, always specify when ordering.

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

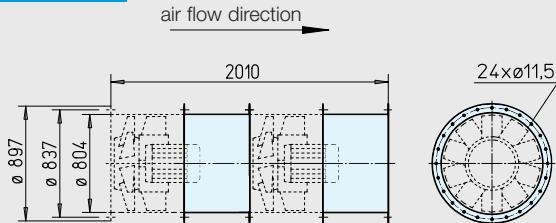

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150. <sup>5)</sup> Y/Δ starting.

<sup>6)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

(Fig. incl. mounting feet (MK), accessories)

#### MP-Z 800

All dimensions in mm

#### ■ Application, casing, air flow direction, etc. see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD:  
Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD:  
Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD:  
Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD:  
Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

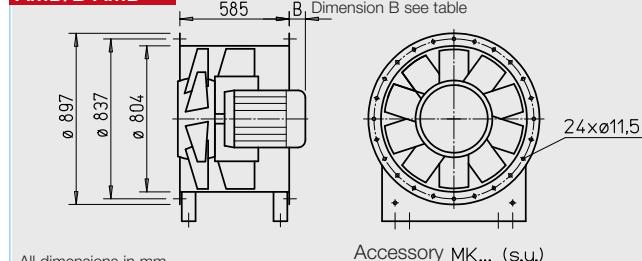

#### ■ Air flow temperatures

- Series AMD:  
Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD:  
Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

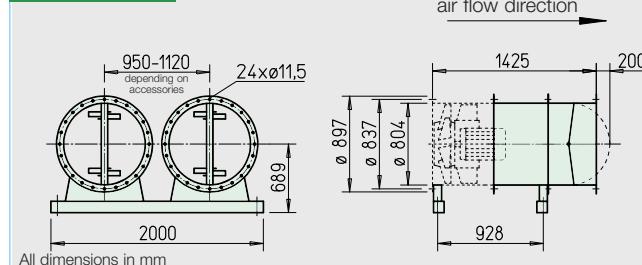

#### AMD/B AMD

All dimensions in mm

Accessory MK... (s.u.)

#### MP-P 800

All dimensions in mm

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 60 kg

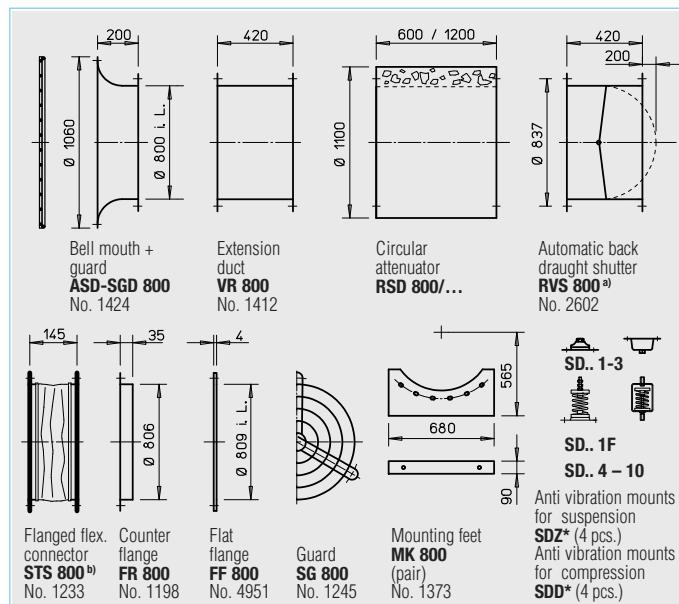

**MP-Z 800** Ref. No. 4911

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 205 kg

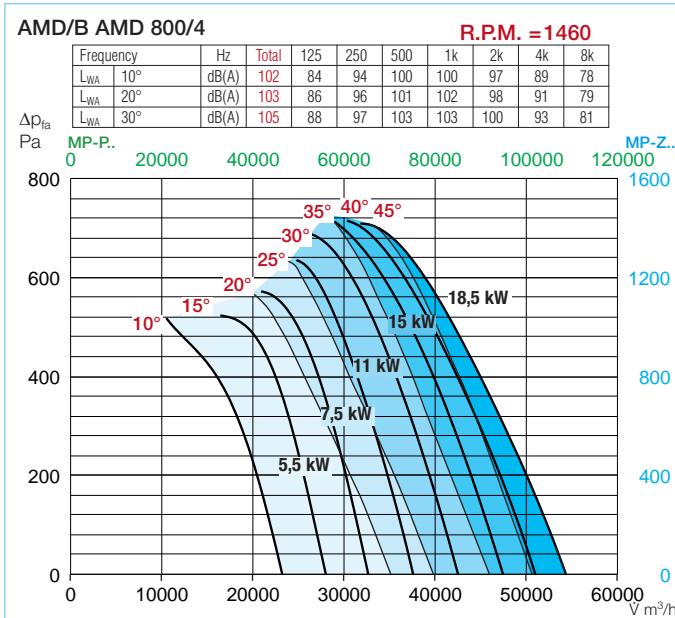

**MP-P 800** Ref. No. 4895

a) For motorised shutters, for ventilation operation, see accessory pages

b) Type for B AMD: STSB 800 F400, No. 1919

\* Type assignment see table, last column

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

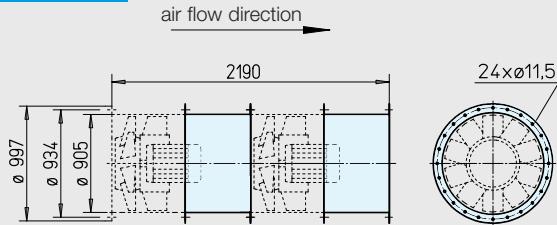

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150. <sup>5)</sup> Y/Δ starting.

<sup>6)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

(Fig. incl. mounting feet (MK), accessories)

#### MP-Z 900

All dimensions in mm

#### ■ Application, casing, air flow direction, etc. see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD:  
Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD:  
Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD:  
Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD:  
Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

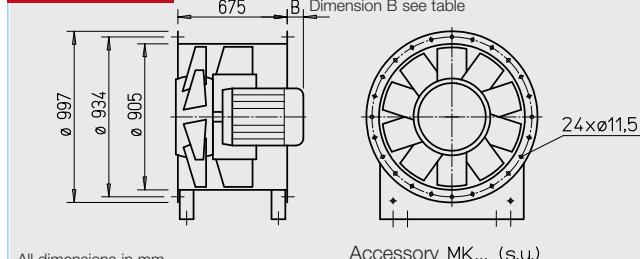

#### ■ Air flow temperatures

- Series AMD:  
Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD:  
Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

#### MP-P 900

All dimensions in mm

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 68 kg

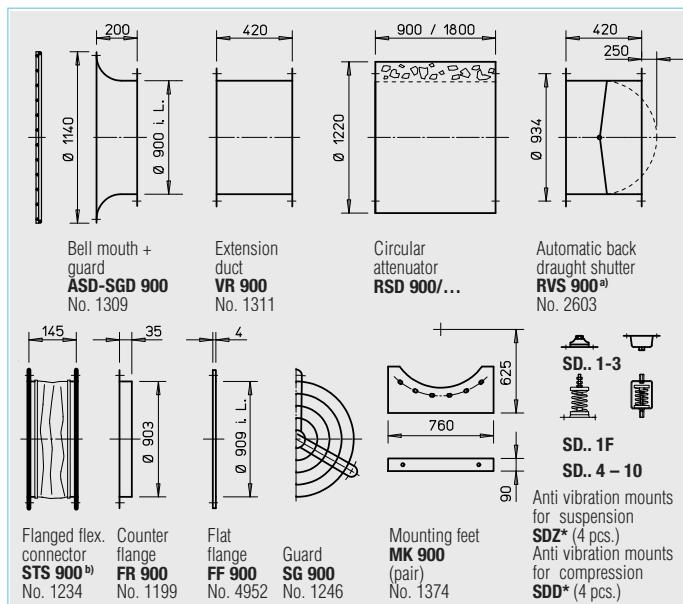

**MP-Z 900** Ref. No. 4912

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 235 kg

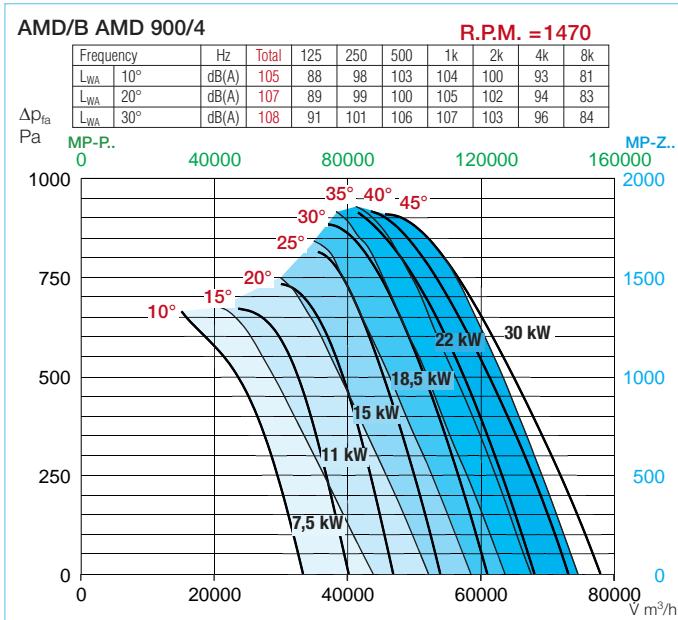

**MP-P 900** Ref. No. 4896

<sup>a)</sup> For motorised shutters, for ventilation operation, see accessory pages

<sup>b)</sup> Type for B AMD: STSB 900 F400, No. 1920

\* Type assignment see table, last column

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

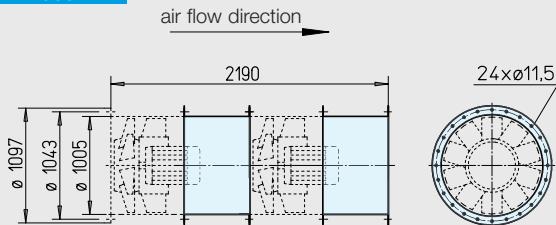

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150. <sup>5)</sup> Y/Δ starting.

<sup>6)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

(Fig. incl. mounting feet (MK), accessories)

#### MP-Z 1000

All dimensions in mm

#### ■ Application, casing, air flow direction, etc.

see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD: Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD: Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing.

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD: Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD: Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

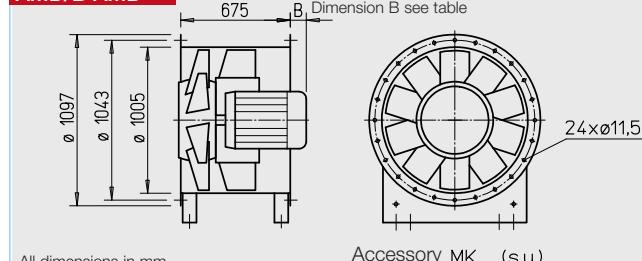

#### ■ Air flow temperatures

- Series AMD: Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD: Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

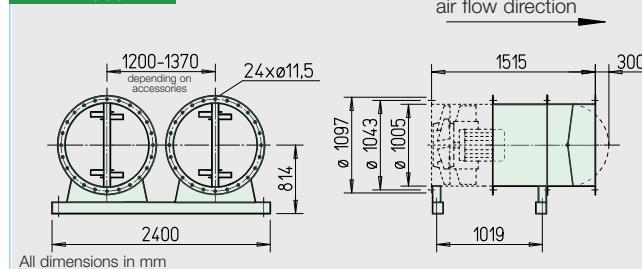

#### AMD/B AMD

All dimensions in mm

Accessory MK... (s.u.)

#### MP-P 1000

All dimensions in mm

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 75 kg

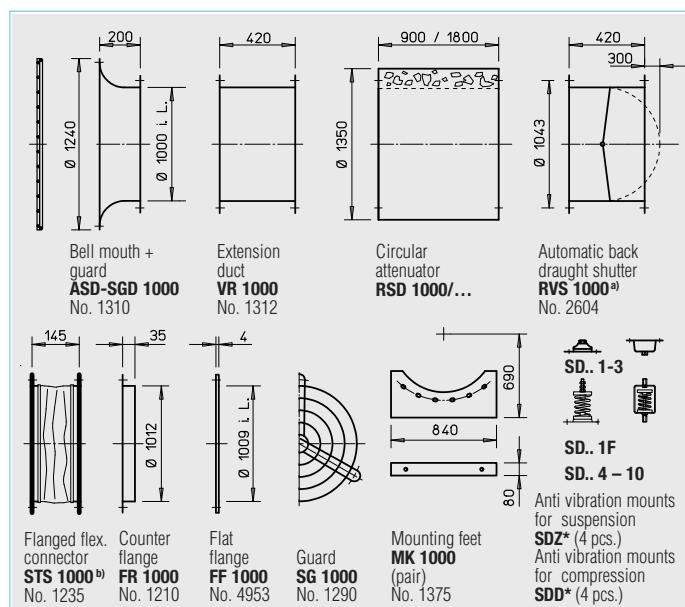

**MP-Z 1000** Ref. No. 4913

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 255 kg

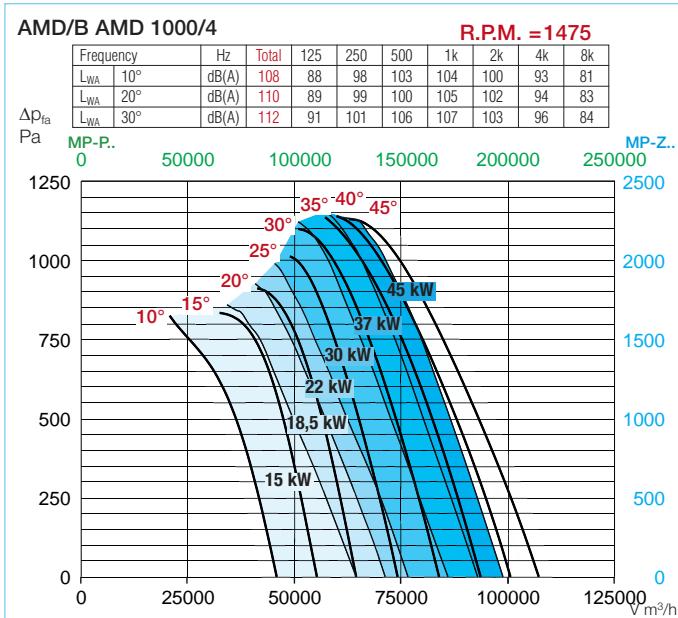

**MP-P 1000** Ref. No. 4897

a) For motorised shutters, for ventilation operation, see accessory pages

b) Type for B AMD: STSB 1000 F400, No. 1921

\* Type assignment see table, last column

Technical description 46  
Design of systems 3 on

**Special executions**

Special execution with inspection opening (additional price) on request.

Special execution with PTC-resistors, which are connected to the terminal box located on the outside of the casing (additional price), essential for operation in connection with frequency inverter or full motor protection switch MSA, always specify when ordering.

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

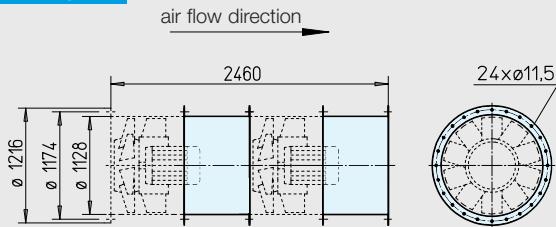

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150. <sup>5)</sup> Y/Δ starting.

<sup>6)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).

((Fig. incl. mounting feet (MK), accessories)

#### MP-Z 1120

All dimensions in mm

#### ■ Application, casing, air flow direction, etc.

see page 46.

#### ■ Impeller

- Hub and blades in corrosion-resistant aluminium alloy. Ten aerodynamically profiled blades achieve highest efficiency and pressure rates in cooperation with the guide vane.
- Dynamically balanced to DIN ISO 1940-1, class 6.3 for low-vibration operation.
- The pitch angle of the blades is adjustable at standstill and factory set.

#### ■ Motor

- Series AMD: Maintenance-free 3-phase a.c. standard motor, protection to IP 55, insulation class F.
- Series B AMD: Direct by IEC-three phase a.c. motor in temperature-resistant execution. Protection to IP 55. Insulation class H. Fire-resistant external cable with sheathing..

#### ■ Motor protrusion

- With some types, the motor casing projects beyond. Protrusion dimension B mm is to be observed according to the type table.

#### ■ Motor protection

- The types are to be protected by means of motor protection switch on site. With the B AMD types this is to be bridged in case of smoke extraction.

#### ■ Electrical connection

- Series AMD: Standard terminal box (protection to IP 55) from polymer, mounted on the outside of the casing.
- Series B AMD: Standard terminal box (protection to IP 55, from aluminium diecasting), mounted on the outside of the casing.

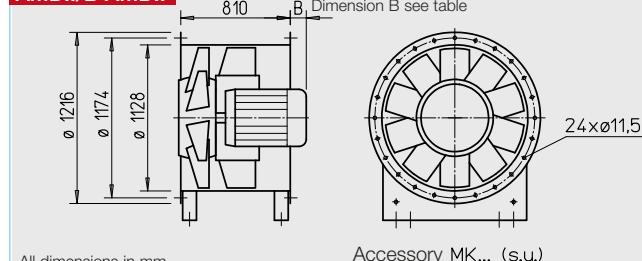

#### ■ Air flow temperatures

- Series AMD: Suitable for ventilation from -20 °C to +40 °C continuous temperature. Higher air flow temperatures for continuous operation on request.
- Series B AMD: Like series AMD, however, in addition for smoke extraction according to the temperature classification to 300 °C/120 minutes or 400 °C/120 minutes.

#### ■ Certification

The smoke and heat exhaust fans B AMD were tested to DIN EN 12101-3., the DIBt approvals are applied. CE certificate of conformity 1511 CPD 504 (F300), 1511 CPD 505 (F400).

#### MP-P 1120

All dimensions in mm

#### ■ Mounting package MP-Z for two-stage Z-unit

To arrange two identical fans in a row, for highest pressure rates. Scope of delivery: Extension ducts (2 pcs) and assembly kit. Weight: 85 kg

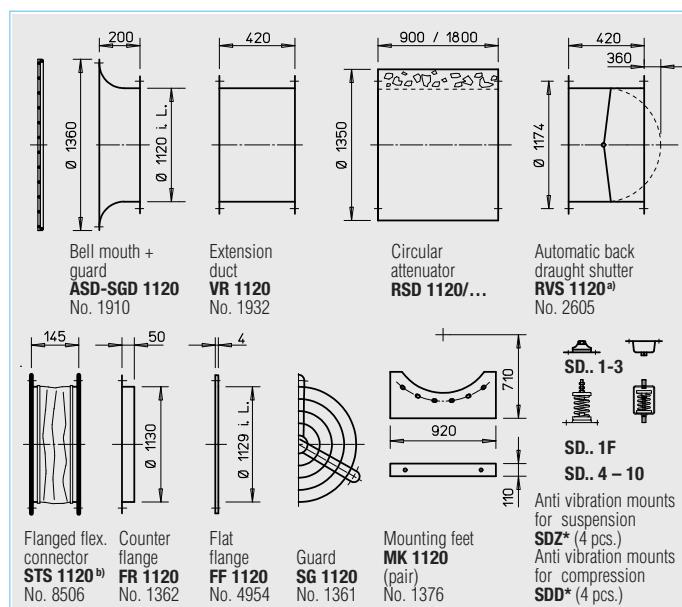

**MP-Z 1120** Ref. No. 4914

#### ■ Mounting package MP-P for parallel P-unit

To arrange two identical fans side by side, for highest air flow rates.

Scope of delivery: Extension ducts, back draught shutters, mounting bars (2 pcs), mounting feet (4 pcs) and assembly kits. Weight: 290 kg

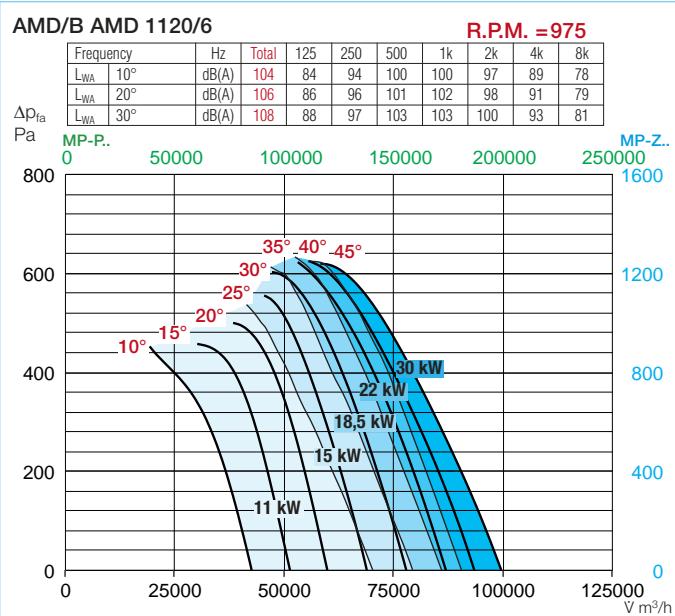

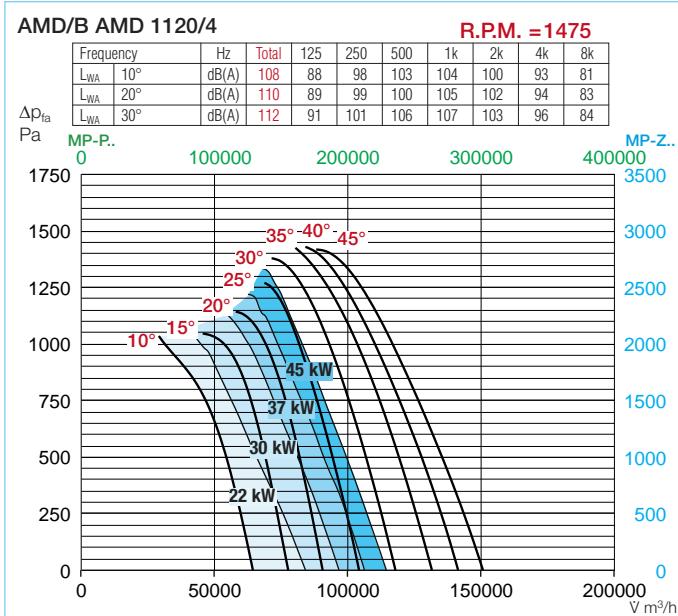

**MP-P 1120** Ref. No. 4898

a) For motorised shutters, for ventilation operation, see accessory pages

b) Type for B AMD: STSB 1120 F400, No. 1922

\* Type assignment see table, last column

Pitch angle is mandatory when ordering. <sup>1)</sup> During ventilation / smoke extraction (nonrecurring 120 minutes). <sup>2)</sup> Higher air flow temperatures during continuous operation (ventilation mode) on request.

<sup>3)</sup> Flush mounted version see product page switches. <sup>4)</sup> With Z-/P-design due to higher total weight, type assignment according to tables on page 150. <sup>5)</sup> Y/Δ starting.

<sup>6)</sup> Requires fan in special execution with PTC-resistors connected to the terminal box located on the outside of the casing (additional price).
